

TREADMILL PROFESSIONAL

Athletic

CROSS 1700T

A treadmill for those looking to increase resistance as a user looking for a high performance equipment as well as those looking for a product with high durability. Its curvature was designed in order not to allow the body weight to be completely unloaded on the heels, but also on the midfoot, which provides greater muscle activation and consequently better absorption of impact by the muscles.

- **LOW MAINTENANCE** - The technology used reduces friction and consequently wear.
- **PHYSICAL REHABILITATION** - It provides greater muscle activation and better absorption of impact by the muscles, helping to prevent injuries.
- **WHEELS FOR TRANSPORTATION** - Features transport wheels in the front area and towing strap in the rear
Rubberized leveling feet for surface adjustment

Adjustment for different efforts

Wheels for easy transport.

Modern design with a curvature to absorb impact and greater muscle activation.
