

BIKE AIR PROFESSIONAL 500BA

Athletic
VISION

The Air Bike 500BA was designed with the support of athletes and coaches. Using air resistance, the Air Bike 500BA automatically adjusts the resistance, the more you pedal, the greater the resistance. It's simple physics with great benefits.

You can create a virtually unlimited number of exercise combinations, just adjust the pace to suit your needs. It is a very effective tool for heating or cooling.

- Offer intense sessions of cardiovascular exercise in your gym. This bicycle is equipped with transport wheels that give it maximum mobility allowing you to easily and comfortably move the equipment to any place in the gym.
- The pedals, made of metal, guaranteeing safety and better performance in training. It also has a bottle holder, which ensures hydration during training.

**Full monitor
for total training
control**
