

BIKE **ATHLETIC 570BV**

Athletic
VISION

Bike Athletic 570BV uses magnetic resistance to create an efficient cardio workout for your home gym. The pulse sensor helps you keep track of your heart rate so you can reach your calorie-shredding high-intensity interval training goals.

- The computer works together with the hand grip (located on the handlebars) to track your heart rate. Monitoring your heart rate zone allows you to maximize the efficiency of your workout – perfect for HIIT (High Intensity Interval Training).
- The bike's large seat can be easily adjusted to accommodate users of different body sizes, allowing it to conform to each individual user's height for exact motion.
- Compact design, needs little storage space, comes with transport wheels that enable you to conveniently move it from one room to another and the belt transmission system is silent, ideal for training in homes.

Ergonomic handlebar with hand grip

Non-slip pedals with adjustable strap

Effort regulator 8 levels

Comfortable seat with vertical and horizontal adjustment

Flywheel	6kg
Drive system	Ribbed belt Two-Ways
Resistance	8 levels
Functions	Pulse heart rate, time, distance, speed and calories
Dimensions	1425x520x1090mm
